Rules: It's simple, we've all done this before.

Start with the first letter of each name, work your way down the puzzle from top to bottom then left to right, and find all of the hidden words.

If you find you have blank spaces, go and fill them in order alphabetically with the other letters.

Always remember the motto hackers are the best you can forget the rest!

Most importantly don't cheat, play nice, and have fun.
